

A smarter way to learn

“I have no doubt that ITSI will be at the forefront of development. It surely adds skills to learners that they can use after school. ITSI really offers what they claim to offer – it is truly a complete solution.”

Mr Leonard Swart
Head of Academics
Midstream College

A smarter way to learn

The sciences of learning has (Education, cognitive sciences, neuroscience) advanced significantly in recent times and these insights are at the heart of the ITS_I Solution. As a **research-informed** company, ITS_I develops solutions that are in line with these developments — enabling schools to deliver any educational content via an **interactive** digital platform for both educators and students.

A key aspect of the ITS_I success story is the unrivalled **training**, professional development and support to lecturers, teachers and students – ensuring they are ready for the **4th industrial revolution**.

ITS_I enables exceptional teaching – delivering an intuitive and tailored educational experience to any educator and any learner for accessible lifelong learning.

Your School's Portal

Educator Console

Create assessments, push resources to learners' e-books and develop your own Educator Folders.

Analytics

View trends and analytics on the use of the ITS1 Solution by your staff and students.

Admin

Manage your institution's e-books and create book lists.

Educator Resources

Download free additional resources.

Digital Lessons

View Digital Lessons for Mathematics, Life Sciences, Physical Sciences and Natural Sciences.

miEbooks

Download the miEbooks app.

A central **hub** for all your **content**

Our solution enables you to organise, manage and distribute digital content from one central hub. ITS Learning Paths streamlines the learning process and eliminates fragmentation by consolidating everything into one educational space.

Simplify your learner's mastery of the curriculum by integrating e-books, milestones and additional content into one single view. Schedule tasks, add due dates and monitor your students' progress.

Access e-books
from thousands of
publishers around
the world

Include learning
resources to
enhance your
lessons' content

Enhance e-books and
self-created content with
multimedia – videos,
audio and more

“This partnership with ITSI has many benefits. These include a centralised location of notes for pupils, lighter school bags, more interesting textbooks and electronic reminders of assessments or assignments that are due. ITSI assists on a weekly basis with staff — helping them to use the ITSI Portal and to engage even more fully with the reality of e-learning.”

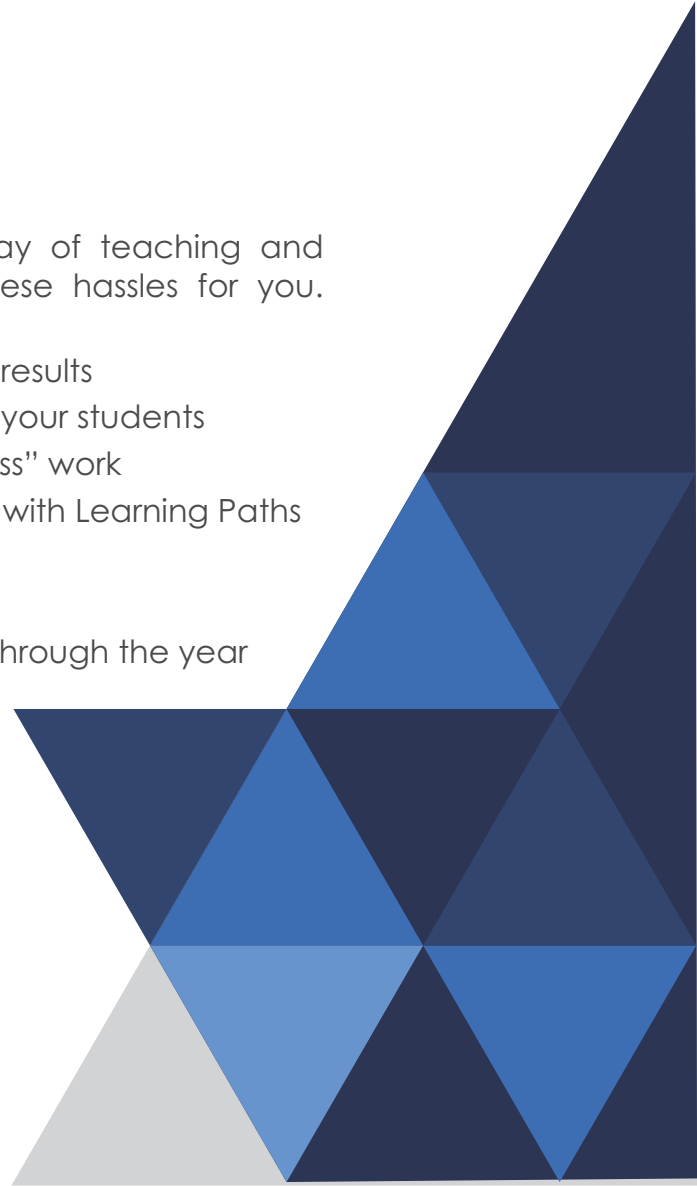

Father Grant James
Head
St Dominic's Priory School

Less admin, more teaching

Daily administration should not get in the way of teaching and learning. Our Educator Console eliminates these hassles for you.

- ✓ Create self-marking assessments with instant results
- ✓ Seamlessly share additional information with your students
- ✓ Address absentees – no more “behind-in-class” work
- ✓ Organise your content per subject, per class with Learning Paths
- ✓ Avoid lost notes and books
- ✓ Instantly share videos, audio, PDFs and more
- ✓ Easily assign books to new entrants halfway through the year
- ✓ Simplify roll call

“I think that educators should start realising the worlds they can open, the fields of study you can use and the techniques you can use to transform your pedagogy to ensure better outcomes at the end of the day.”

Mariette Vorster
Teacher
Touwsrante VGK Primary

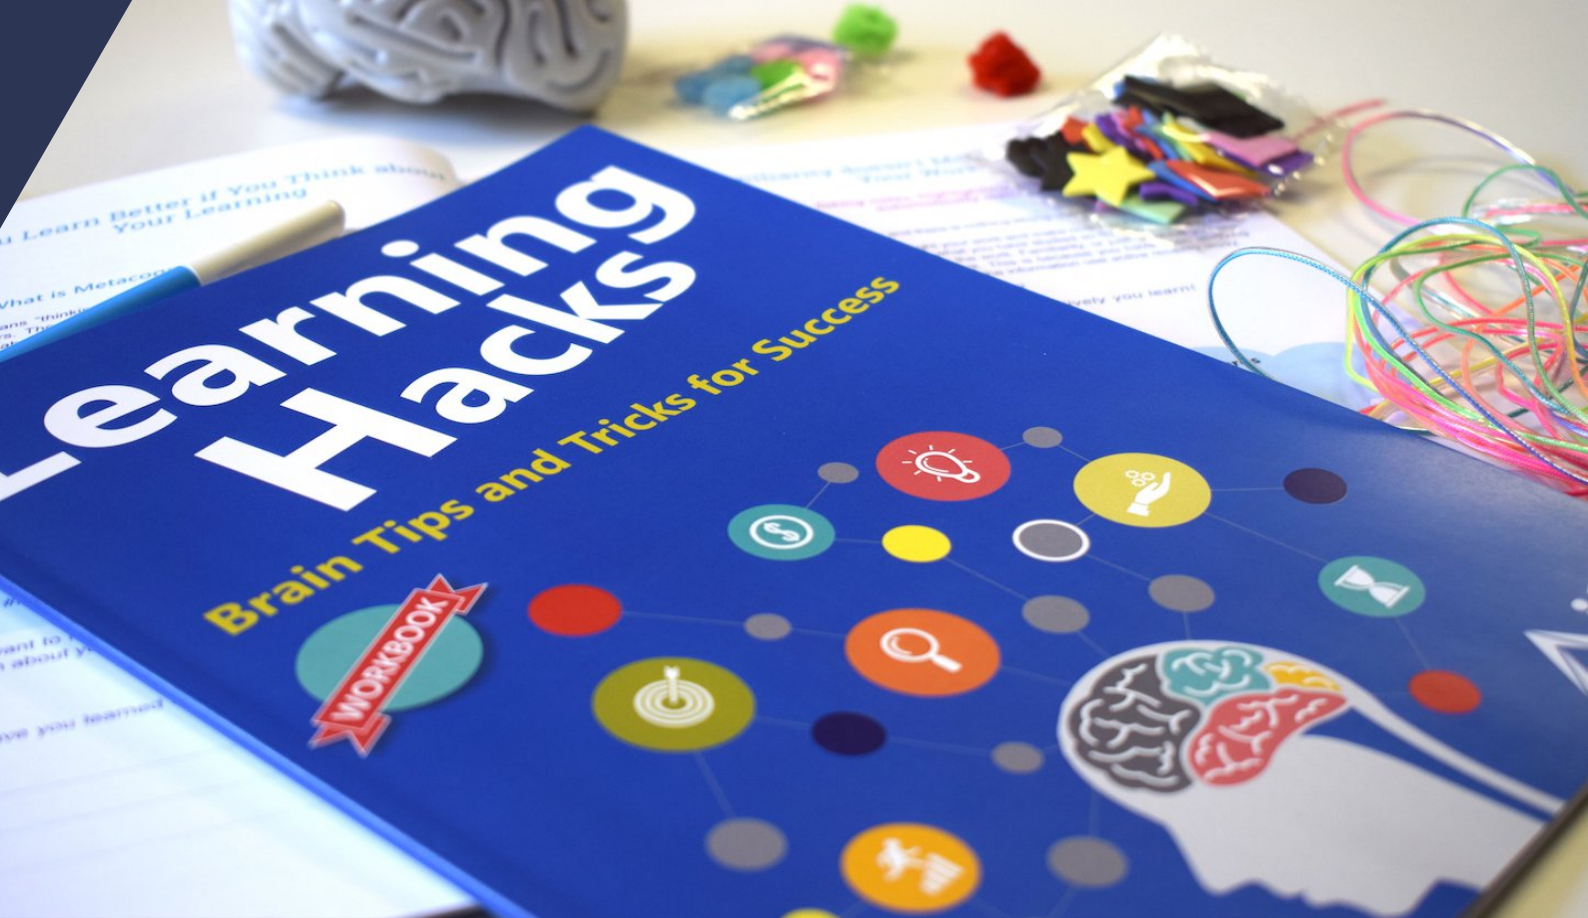

Engaging and interactive learning content

Teachers are at the forefront of learners' educational experiences. By **engaging** students in the learning process, you increase their attention and focus. Provide them with a variety of content formats such as videos, PDFs, e-books, audio clips, and more – and link this directly to their **curriculum**, motivating them to practice critical thinking skills. Promote meaningful **learning experiences** through enhanced content that is easy to access through uniquely created learning paths.

Through the use of technology, as well as a variety of **teaching methods**, teachers inspire learners to learn. When learners are exposed to content that is inspiring, combined with brain-friendly approaches, they perform better and the overall discipline in your classroom improves.

“The course really helped me to think differently about my way of teaching. I enjoyed all the parts of the course, especially the fact that it was based on sound research.”

Teachers
Bryanston Parallel Medium School

Equip learners for a dynamic future

Are you preparing learners for jobs that don't exist yet?

According to the World Economic Forum, we are in the midst of the 4th Industrial Revolution. It gives rise to millions of technological jobs while more traditional jobs are being automated. It is now more important than ever that we equip learners with the knowledge and **21st-century skills** needed to thrive in our transforming world. Teachers are challenged daily to keep up with advances in technology and how to apply them in the classroom whilst creating critical thinkers and **lifelong learners**.

ITSI's Learning Hacks is a brain-based study skills and learning course — designed for learners, parents and teachers. It is based on insights from the **sciences of learning**. It empowers students to study more effectively and enables parents and teachers to establish an environment that is conducive to learning and mastery of the curriculum.

ITSI's wide variety of **Professional Development** courses empowers teachers to embrace technology, and in particular e-learning tools, 21st-century skills, the latest presentation tools for optimal **student engagement**, flipped classroom practices, blended learning approaches, and more.

A person is using a tablet computer. The screen displays the ITSi Student's Library app. The app has a dark sidebar menu on the left with icons for Library, Groups, Book Resources, Upcoming Events, Folders, Learning Tools, Newsletter, Accounts, Auto Sync, Analytics, Help, and What's New. The main content area is titled 'Student's Library' and features a search bar and a grid of book covers. Visible covers include 'Siyavula Mathematics Grade 1...', 'English for Success Grade 10...', 'Via Afrika Geography Grade 1...', 'Focus Life Orientation Grade 1...', 'Focus History Grade 10 Learn...', and 'Focus Life Sciences Grade 10...'. The ITSi logo is visible in the bottom left corner of the app interface.

“We started our partnership with ITSi because we saw that the world out there is changing and we realised if the world is changing, we need to adjust our teaching and learning in school.”

Chris Zaayman
Principal
Maragon Mooikloof

Supporting you in your **quest** to be a community **leader**

Your school is a **pillar in your community**. You want to remain at the forefront of development – in terms of technology, teaching practices and more.

Be seen as a school that facilitates 21st-century global competencies

Develop teachers to be **brain-changers** who enable learners to effectively use 21st-century skills to collaborate, embrace creativity, communicate effectively, and become **critical thinkers**. Adopt the latest research on learning and the brain, facilitated by ITSI's **Professional Development** team to ensure that learning outcomes are improved and learners are prepared to face the challenges of the **21st-century** head-on.

Be seen as a school that embraces technology

The ITSI Solution provides an interactive and collaborative way of learning and teaching. Learners use devices to access learning content such as e-books, notes, sketches, flashcards, and more. Teachers create and share **Learning Paths**, additional content, self-marking **assessments** and intervention plans – individualised to the learner's needs. **Offline** content enables educators to embrace **flipped classroom** techniques that promote thinking, research and time management skills.

Combine **education** and **technology** – enhance **learning** outcomes

For more than a decade, ITSI has been assisting schools to successfully integrate technology in their teaching and learning, and more importantly, to combine it with research-based fundamentals from the sciences of learning.

Trusted advice on e-learning implementation, supported by years of experience and research

Step-by-step onsite training and support

Professional development courses, endorsed by SACE

Online and telephonic support via a dedicated helpdesk

Easily accessible tutorial videos for continuous guidance

Developments based on the principles of the sciences of learning

Interactive educational resources to support learning outcomes

Continued research in the fields of educational neuroscience

“We were pleasantly surprised by ITSI’s expertise and turnaround time. It is a pleasure working with their technical staff.”

Lionel Smith
IT Manager

Simplified book management, reduced cost

Successfully manage the selection, assignment and allocation of e-books and learning content through a dedicated school portal. Assign **self-created** and/or proprietary content to individuals, groups, classes and more. Save costs on the printing of class notes, handouts and assignments. Content, including **e-books** and notes, is **available offline**, backed-up and can be recovered at no additional cost.

“I am no longer a person standing in front of the classroom and giving them a whole lot of information. The technology of ITSI has really allowed my students to make the subject alive where they create their own content and I facilitate learning.”

Ms Carla van der Walt
Teacher
Maragon Mooikloof

“It is our role as educators to not only look after the children, but to also assist parents, expecting them to engage with the child. Analytics have the benefit of assisting parents to identify the problem behind the progress of the learner.”

Cindy Harris
Deputy Principal
Westering High

Identify the challenge, intervene **timeously**

Personalised teaching and learning are made possible with **analytics** that determine the learners' engagement with the content early on. **Self-marking assessment** tools further enable you to conduct low-stakes formative tests. React timeously to the challenges your learners are facing.

In a traditional teaching environment, tests and exams indicate a learner's understanding of the work, with limited insight into their **engagement** with the content, textbook or other educational resources, before being tested. Through the **insights** provided by the **analytics** associated with ITS1's miEbooks app, you can monitor learners' engagement with the content and compare this to other learners in the class.
